

★ Soak, Wash, Polish, Perfect

HIT-CSP has been developed to work in commercial kitchens as a pre-wash soak that strips cutlery of food residue before washing.

When used in conjunction with your **commercial dishwasher** and a **cutlery polisher**, we have observed a near 100% cleanliness rate, compared to using a dishwasher alone. After one soak, our clients tell us their "cutlery looks like new".

We believe this product is a game changer in cutlery processing automation, the results are phenomenal.

1 scoop per 10L of warm water. The solution is reusable for many soaks during a shift. 50 scoops per 5kg.

Available in 8kg containers for \$108 ex GST
